Comment on the Financial Report 2019

From Matthias Schmid-Huberty, Administrative Director and Mathias Kronig, Head Finances/Controlling

Swiss TPH presents an ordinary result of CHF -208,623 in 2019, compared to CHF -262,153 in 2018. The operating result from activities was CHF 13,360, which represents an increase of almost CHF 350,000 over the previous year (CHF -334,494). The financial result reached CHF -221,983 (CHF 72,341 in 2018), which was caused mainly by exchange rate losses.

In 2019, the total operating income of Swiss TPH slightly exceeded CHF 90.3 million – a solid increase of CHF 3.7 million (4%) over the previous year. The core funding remained stable. CHF 2.5 million are recognised as deferred income and will be used for the new building. Therefore, despite the net increase of CHF 0.2 million in core funding, reaching CHF 19.3 million in 2019, the ratio slightly weakened to 21.4% of the total operating income (-0.6%).

Third party funding was CHF 71.7 million, resulting in an increase of CHF 3.4 million (5%) over 2018. The proportion of self-managed funds slightly increased and remains high but stable at 78.6%.

In line with the higher volume of activity (+4%), personnel expenses increased by CHF 1.3 million (+3%), while expenses for projects abroad increased considerably by CHF 2.1 million (6%).

The local expenditures for projects increased to 25.1 million, growing by 6% to a share of over a quarter of the Swiss TPH total budget. The majority was still spent in Africa (CHF 12.3 million), even though dropping by 22%. While the spending for European projects sharply increased (CHF 10.6 million/+82%) for the second year in a row, the growth in Asia (CHF 2.0 million/+10%) remained similar to previous years. In the rest of the world, the project volume was halved (CHF 0.16 million/-47%). Fiduciary funds developed to CHF 11.8 million/+5% in line with the general growth of turnover.

As in previous years, additional depreciations for building installations were posted in 2019. These installations will not be used in the new building in Allschwil (currently in the construction stages) and are to be amortized before having reached the end of their useful life.

Compared to 2019, the balance sheet total increased by 13% / CHF 7.4 million to CHF 64 million. Receivables from services increased sharply, while other short term receivables and accrued income remained stable, resulting in a total increase of CHF 8.4 million of the current assets. At the same time, the non-current assets decrease by CHF 1 million due to reclassification of the building in progress.

Total investments amounted to CHF 663,029, reflecting the continued decrease of last year in light of the upcoming move to the new building in 2021, halted new investments considerably. CHF 124,619 were project investments of which all were depreciated in the month of purchase, CHF 92,056 were intangible assets and the remaining CHF 446,354 represented the tangible assets. With such low investment activity, Swiss TPH has been living again from its substance. Swiss TPH will have the opportunity to make up this backlog in investment when equipping the new building.

Balance Sheet

	Notes	31.12.2019 CHF	31.12.2018 CHF
Assets

Notes 1. General information

The Swiss Tropical and Public Health Institute (Swiss TPH) is a public organisation based in Basel (Switzerland) with its own legal status under the laws of Switzerland ("öffentlich-rechtliche Anstalt").

By uniquely combining research, services and education and training, Swiss TPH aims to improve the health and well-being of populations through a better understanding of disease and health systems and by acting on this knowledge. Our translational approach, from innovation and validation to application, enables us to bring novel diagnostics, treatments and vaccines directly to people and communities. On 1 January 2017, the treaty between the Canton Basel-Stadt and the Canton Basel-Landschaft concerning the common ownership of the Swiss TPH came into force.

2. Organisation and Governance

Board of Governors

The board of Governors is called the "Kuratorium". Its members and its president are appointed by the Government of Canton Basel-Stadt and the Canton of Basel-Landschaft. The actual members of the Kuratorium are:

Dr. Andreas Burckhardt Chairman

- Dr. Ariane Bürgin (as of 1 July 2019)
- Prof. Dr. med. François Chappuis
- Prof. Dr. Sabina De Geest
- Dr. Doris Fellenstein Wirth
- PD Dr. Monika Wenk
- Mr. Joakim Rüegger (until 30 June 2019)
- Dr. med. Cornelia Staehelin
- Prof. Dr. Didier Trono
- Mr. Christoph Tschumi

Committee

The Committee monitors the financial and accounting processes and systems of Swiss TPH, evaluates the independence and effectiveness of the external auditors and ensures the flow of communication between the Directorate, the administration, auditors, and the Board of Governors. The Committee makes appropriate recommendations to the Board of Governors.

The actual members are:

- Dr. Andreas Burckhardt Chairman
- Dr. Ariane Bürgin (as of 1 July 2019)
- Dr. Doris Fellenstein Wirth
- Mr. Joakim Rüegger (until 30 June 2019)
- Mr. Christoph Tschumi

Auditor

PricewaterhouseCoopers AG, Basel has been assigned by the Governments of the Cantons Basel-Stadt and Basel-Landschaft as the auditor of Swiss TPH.

3. Basis of preparation and accounting policies

Accounting Standard

These financial statements have been prepared in accordance with the Swiss GAAP FER issued by the foundation for accounting and reporting recommendation, Switzerland.

Currency

Swiss TPH presentation currency is CHF (Swiss francs).

Foreign currency transactions

Assets and liabilities in foreign currency are valuated at the closing rate at the balance sheet date or at the donor's stipulated rate. Foreign currency transactions are recorded on initial recognition in the functional currency at the transaction rate. Exchange rate differences are recognised in the income statement.

Revenue recognition

Revenue from rendering medical services and fees from teaching and training are recognised in the period of providing those services. Revenue from projects is recognised to the extent of the recoverable expenses of the reporting period. Project results are neutralised during the project period, an eventual result is realised at the end of the project. Funds from national and local government are recognised in the period for which they were funded.

Borrowing costs

All borrowing costs are recognised in the income statement in the period in which they are incurred.

Property, plant and equipment

Core tangible fixed assets items are measured at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is charged so as to allocate the cost of assets less their residual values over their estimated lifetime, using the straight-line method. The following annual rates are used for depreciation of property, plant and equipment.

Asset category	Annual deprecia- tion rate	Useful life in years
Land	0.00%	
Buildings Basel	3.00%	33.33
Building installations Basel	5.00%	20.00
Furnishings	10.00%	10.00
Laboratory equipment	12.50%	8.00
Medical equipment	20.00%	5.00
Offices machines, communication systems	20.00%	5.00
Vehicles	20.00%	5.00
Tools, utensils	10.00%	10.00
Hardware	25.00%	4.00
Collections, books, movies	10.00%	10.00
Assets in leasing	depending	on contracts

Fixed assets at costs less than CHF 5,000 are not capitalised.

Fixed assets purchased with projects funds for the purpose of project operations are not capitalised as the ownership of these assets remains with the donor. The capitalisation of maintenance costs depends on if they are value-preserving or value-adding respectively extending the useful life of the respective fixed asset.

If there is an indication that there has been a significant change in depreciation rate, useful life or residual value of an asset, the deprecation of that asset is revised prospectively to reflect the new expectations.

Long-term financial assets

Employer contribution reserves or similar items are recognised as assets under long-term financial assets. The difference to the respective value of the prior year is recognised as personnel expenses in the result of the period.

Intangible assets

Intangible assets are purchased computer software that is measured at cost less accumulated amortisation and any accumulated impairment losses. It is amortised over its estimated useful life time of four years using the straight-line method.

Inventories

Inventories are valued at the lower of cost and selling price. Cost is calculated using the average-method.

Impairment of assets

At each reporting date, fixed and intangible assets are reviewed to determine whether they have suffered an impairment loss. If there is an indication of possible impairment, the recoverable amount of any affected asset is estimated and compared with its carrying amount. If the estimated recoverable amount is lower, the carrying amount is reduced to its estimated recoverable amount. An impairment loss is recognised immediately in the income statement.

Similarly, at each reporting date, inventories are assessed for impairment by comparing the carrying account of each inventory item with its selling price less costs to complete and sell. If an item of inventory is impaired, an impairment loss is recognised immediately in the income statement.

If an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but not in excess of the amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately in the income statement.

Receivables

The size of impairments in receivables is considered as the difference between the carrying amount of the assets and the present value of the expected future cash flow. The provision for bad debts is calculated by categorising the debts as follows:

Due amount	Days past due	Provision
< CHF 30,000	> 0	2%
> CHF 30,000	1-90	2%
> CHF 30,000	91-180	15%
> CHF 30,000	181-270	30%
> CHF 30,000	271-360	50%
> CHF 30,000	> 360	100%

Payables

Payables are recorded at their fair value, represented by the amount to pay.

Provisions

Provisions are determined based on impartial and economically reasonable principals. Risks are taken into account adequately.

4. Notes on the financial statement

4.1 Cash and cash equivalents	2019 CHF	2018 CHF	
Cash in hand	55.614	86,056	
Post accounts	1,875,988	575,618

The new building "Belo Horizonte" is being constructed in Allschwil (Basel-Landschaft) and will be ready by the end of 2021. With the move of Swiss TPH to Allschwil, the buildings at the actual headquarter at Socinstrasse will be abandoned and with it the building installation reflected in the tangible assets. Therefore, additional yearly CHF 0.9 million of depreciation for building installations started in 2015, adjusting the remaining useful time until end of 2021.

TOTAL	38,030,443	35,952,949

Based on the accounts at the end of the year, the project leaders evaluated the accrued revenues and expenses (cost to complete) for their projects. These evaluations were taken into consideration by the Directorate on the occasion of the approval of the financial statement. All of the project related deferred incomes are sustained based on an existing project contract. At the moment, there is no indication for any losses from long-term projects, which would need to be recognised.

Due to irregularities identified in the procurement of equipment in the SDC project "Medical Education Reform Project" (MEP) in Tajikistan, a provision of CHF 90,000 was accrued for the additional costs that may occur.

The bank in Tajikistan holding SDC funding in the amount of CHF 60,000 for the MEP faced liquidity shortages. The remaining funds were promised to be paid out in limited tranches on a weekly basis – the bank did not comply with this promise in 2019 and the remaining CHF 30,000 is expected to be lost. Significant irregularities and a confirmed fraud attempt committed by the supplier in the procurement process of motorcycles in the SDC project "Programme d'Appui aux Districts Sanitaires" PADS in Chad foresee a potential damage of CHF 120,000.

The research provision was accrued by CHF 16,710 due to the internal regulations for the Research Fund.

4.12 Other non current liabilities	2019	2018
	CHF	CHF
Swiss National Science Foundation Projects - Overhead (long term)	791,908	434,626
TOTAL	791,908	434,626

The total overhead contribution of the Swiss National Science Foundation (SNSF) is paid in the year of grant allocation. The provision allows the use of the contribution during the whole project period. A considerable increase of SNSF funded projects in 2019 led to a high increase in provisions.

According to the decision made at the Directorate's meeting (17 October until 19 October 2006), a provision of CHF 500,000 for personnel or their dependants in case of hardship was created. The disposition of fund means is defined in the fund regulations.

The provision for potential taxes abroad is created for those countries where expatriate or local Swiss TPH staff are possibly supposed to pay income taxes. According to local labour law in various project countries such as the Democratic Republic of the Congo, Albania or Rwanda, end of contract payments are to be borne by the employer.

Swiss TPH committed to cover CHF 10,000,000 of the investments costs of the new building "Belo Horizonte". For this purpose, this amount will be accrued in the period of 2017–2020.

1,630,000	1,630,000
CHF	CHF
2017	2018

Within the scope of the inter-cantonal contract concerning the common ownership of the University of Basel between the cantons of Basel-Stadt and Basel-Landschaft, Swiss TPH was granted a contribution of CHF 6,040,000 (2018: CHF 6,040,000) for the period of 2019 for structural professorships and teaching activities within the curriculum of the University of Basel. In 2019, CHF 213,902 (2018: CHF 204,731) was credited as matching funds for SNSF projects and the amount of CHF 346,527 (2018: CHF 616,028) as share of SNSF-overhead contribution.

The Swiss Federal Council granted Swiss TPH CHF 25,000,000 for scientific activities in the period of 2017 – 2020. The amount 2018 was reduced by 3% from CHF 6,201,500 to CHF 6,015,600 due to an inflation adjustment in order to be in line with the debt break as decided by the Swiss Parliament. The amount 2020 will also be reduced by 3% from CHF 6,327,800 to CHF 6,140,900.

Under condition of the yearly budget approval by the Swiss Parliament, Swiss TPH will receive the following amounts:

2017	2018	2019	2020
CHF	CHF	CHF	CHF
6,233,300	6,015,600	6,237,400	6,140,900

As a founding member of the Centre Suisse de Recherches Scientifiques en Côte d'Ivoire (CSRS) and the Ifakara Health Institute (IHI) in Tanzania, Swiss TPH acts as the leading house on behalf of the State Secretariat for Education and Research (SERI) and administers CHF 500,000 for each of these institutions.

Swiss TPH committed to cover CHF 10,000,000 of the investments costs of the new building "Belo Horizonte". For this purpose this amount will be accrued over the period of 2017 – 2020.

As reported in the income statement, Swiss TPH recorded its employee benefits in the line Personnel expenses.

All expenses and costs are recognised in the income statement. In respect of accruals for overtime and vacation please refer to note 4.10 and 4.11.

Pension funds

Swiss TPH's pension plan is a pension scheme according to the federal law on occupational pension schemes (BVG) and is part of the "Helvetia Sammelstiftung für Personalvorsorge", contract number 30935. The funding consists of employers' contributions, employees' contributions, and of an annual interest (1% since 1 January 2017). This pension plan is part of a collective plan with reinsurance arrangements (full insurance within the framework of a collective insurance contract), the pension institution is not the risk bearer and therefore no additional payment obligations can arise in case of a deficit.

G. Cissé, Sabbatical in Australia 2018	0	63,000
Subtotal	356,416	398,025
Total	914,928	974,875

For the year 2019, Swiss TPH paid a rental fee of CHF 783,720 for the buildings owned by the Rudolf Geigy Foundation.

6. Risk assessment

Swiss TPH actively manages its risks related to the financial statement. A yearly risk assessment considers the probability of occurrence and the severity of damages of the identified risks and appropriate measures are defined. The risk assessment is performed by the Directorate and then subsequently reviewed and approved by the Board of Governors.

7. Approval of financial statements

These financial statements were prepared and approved by the management of Swiss TPH as representatives of the Board of Directors. They are subject to final approval by the Board of Governors (Kuratorium) on 14 May 2020.

8. Subsequent events after the balance sheet date

The COVID-19 outbreak has developed rapidly in 2020, with a significant number of infections in Switzerland and worldwide in the countries where Swiss TPH carries out research and operations. Measures taken by governments to contain the virus have affected the Swiss TPH activities in research, services and education and training in many ways:

- The limitation of assembly of people resulted in the requirement for all employees to work from home with the initial effect of reduction in productivity.
- The travel clinic was closed due to limitation of assembly of people and to restricted travel, resulting in a heavy drop in demand and turnover. The medical staff was transferred to the University Hospital in Basel to support the COVID-19 clinic, which mitigated the financial risk to a certain extent.
- The diagnostic unit experienced a drop in demand of up to 50% due to the lockdown and limitation of ordinary medical consultations of private medical practitioners. Additional diagnostic activities were identified and launched in the field of COVID-19 antibody testing.
- Due to government measures taken and in line with the policy of the University of Basel, which Swiss TPH is an associated institute of, all clinical trials had to be suspended, causing a delay in implementation and therefore a drop in income for 2020 estimated at 20% at the COU unit (-450 KCHF). Additional COV-ID-19 related projects were applied for and will potentially mitigate the drop in income for 2020.
- Due to travel restrictions and cancelled flights, the implementation of service projects in most countries of operations will be delayed in one way or another and cause a drop in turnover with an impact for the SCIH department (- 200 KCHF), not considering additional opportunities due to COVID-19.
- While some education and teaching activities could be conducted via virtual channels, many

postgraduate courses needed to be cancelled or postponed. A significant drop in turnover of sold courses will impact the 2020 result for the ET department (–180 KCHF).

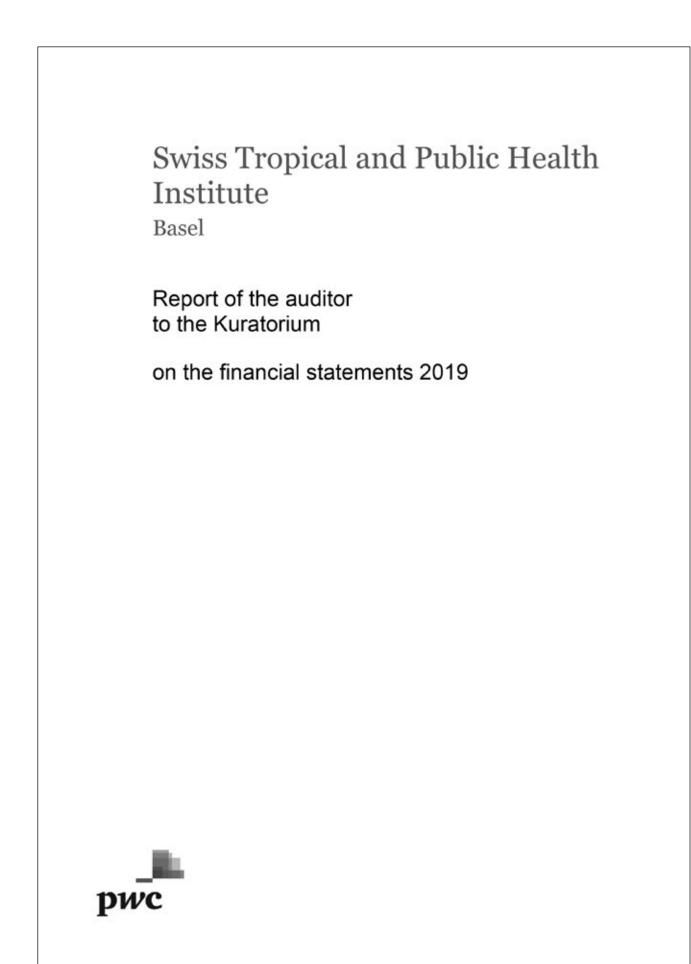

- Research projects with the requirement of the use of laboratories continued under heavy limitations, resulting in delays of research results.
- Other research activities could be continued in the usual way.
- For some research groups the COVID-19 pandemic will trigger a high demand and therefore induce a potential higher income.

As a result of these effects, the cumulative revenues in the first four months of 2020 are estimated to be not more than 5% lower than the 2019 revenues in the same period with the major negative impact identified in April 2020 and also anticipated for May and June 2020. This impact will be mitigated by additional funds for research and services in the field of COV-ID-19, which potentially will increase the 2020 turnover. Less expenditures in regards to maintenance and facility management due to the de facto lock down of the buildings and less costs for travelling and expenses will also contribute to the mitigation.

The strong liquidity of Swiss TPH has not been negatively affected. The foreign exchange risk was partially mitigated by sales of USD und EUR, which will not be required to be spent in foreign currency (natural hedge).

Swiss TPH has not applied for government-supported loans nor applied for short-shift working compensation (Kurzarbeitsentschädigung) for the time being. It will however ask for the compensation of working days due to homeschooling by employees triggered by the governmental closure of schools, day care facilities and kindergartens.

Depending on the duration of the COVID-19 crisis and continued negative impact on economic activity, the entity may experience further negative results, liquidity restraints and incur additional impairments on its assets in 2020. The exact impact on the activities in the remainder of 2020 and thereafter cannot be predicted.

Report of the auditor

to the Kuratorium of Swiss Tropical and Public Health Institute

Basel

Report of the auditor on the financial statements

On behalf of the Kuratorium and in compliance with §16 of the treaty between the cantons of Basel-Landschaft and Basel-Stadt over the joint sponsorship of the Swiss Tropical and Public Health Institute (Vertrag zwischen den Kantonen Basel-Landschaft und Basel-Stadt über die gemeinsame Trägerschaft des Schweizerischen Tropen- und Public Health-Instituts), we have audited the financial statements of Swiss Tropical and Public Health Institute, which comprise the balance sheet, income statement, cash flow statement, statement of changes in equity and notes (page 4 to 25), for the year ended 31 December 2019.

Kuratorium's responsibility

The Kuratorium is responsible for the preparation of the financial statements in accordance with Swiss GAAP FER, the requirements of Swiss law and the treaty. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Kuratorium is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended 31 December 2019 give a true and fair view of the financial position, the results of operations and the cash flows in accordance with Swiss GAAP FER and comply with Swiss law and the treaty.

Report on other legal requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists which has been designed for the preparation of financial statements according to the instructions of the Kuratorium.

We recommend that the financial statements submitted to you be approved.
